

INTERNSHIP OFFER LETTER

Date: 31st July 2025

To,
Mr. Prathamesh Jaiswar
Universal College of Engineering

Subject: Internship Offer for the Kalash Platform Project

Dear Prathamesh,

We are pleased to offer you the position of **Automation Engineer Intern** for the **Kalash Platform Project** at **Dhwaj Platform Pvt. Ltd.**

This opportunity is part of our student partnership initiative, where we collaborate with skilled and driven individuals to develop forward-thinking digital platforms. Your technical aptitude and interest in workflow automation and backend systems make you a valuable addition to our team.

Internship Details

- **Position:** Automation Engineer
- **Project:** Kalash Platform
- **Internship Start Date:** 15th July 2025
- **Duration:** Until project completion
- **Location:** Hybrid (Remote + On-site at Dombivli East as required)
- **Working Days:** Monday to Saturday (flexible based on workload)
- **Reporting Manager:** Mr. Dhananjay Singh, COO – Tech
- **Stipend Structure:** This is a paid internship. Payment will be made on a project-wise basis, disbursed after successful project completion and internal approval, and equitably allocated among contributors.

About the Kalash Platform

The **Kalash Platform** is an AI-powered SaaS system focused on automating lead management, communication workflows, and business analytics. Your role will directly support the backbone of this platform by building and maintaining automated backend processes.

Your Key Responsibilities

As an Automation Engineer, you will be expected to:

- Design and maintain automation workflows using **n8n** or similar tools
- Support backend tasks like **lead data management**, **webhook configuration**, and **system alerts**
- Collaborate with frontend and product teams for smooth integration
- Troubleshoot issues and ensure reliability of workflows
- Apply logic-driven thinking and improve efficiency through automation

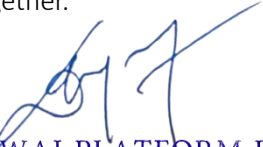

Learning Outcomes

Through this internship, you will gain hands-on experience with:

- **n8n**, workflow automation platforms, and backend scripting
- REST APIs and webhook integrations
- Automation in SaaS tools and B2B platforms
- Collaboration using GitHub and task tracking tools
- Working in a dynamic product development environment

We believe this internship will enhance your technical foundation and give you the experience needed for your career growth. Upon successful completion of the project and evaluation, you will be awarded an official **Internship Certificate** from Dhvaj Platform Pvt. Ltd.

We look forward to welcoming you to the **Kalash Platform Team** and building something meaningful together.

DHWAJ PLATFORM PVT LTD.
