EDUCATION

Universal College of Engineering, Mumbai

2023 – 2027

Bachelor of Engineering in Computer Science

EXPERIENCE

AI & Automation Engineer Intern

Jul 2025 – Mar 2026

Dhwaj Platform Pvt. Ltd. — SalesPal

- Developed AI-powered automation solutions for the **SalesPal** platform using **Python, FastAPI, Docker, and n8n** to streamline business workflows and marketing operations.
- Built backend services for AI-driven image and video generation by integrating external AI APIs into scalable automation pipelines.
- Integrated the **Instagram Graph API** to automate lead capture from Instagram Ads and developed REST APIs for social media automation.
- Contributed to the development of an **AI voice calling agent** for automated customer interactions and business communication workflows using the **LiveKit** framework.

PROJECTS

ReplyLink | Repo

- Built an AI-powered Instagram automation platform using **FastAPI, Next.js, PostgreSQL, Supabase, Docker, and the Instagram Graph API** to automate Comment-to-DM workflows and customer engagement.
- Implemented OAuth authentication and webhook-based event processing for real-time social media automation.
- Developed a modular backend to manage automations, conversations, and business workflows with scalable REST APIs.
- Built an AI-powered FAQ agent to automatically respond to customer queries and improve response efficiency.

InboxPilot | Repo

- Engineered a full-stack AI email assistant using **FastAPI, Next.js, PostgreSQL, LangChain, LangGraph, Celery, Redis, and React** to automate inbox management using Large Language Models.
- Built a modular service-oriented backend with **FastAPI and SQLAlchemy**, implementing **AES-256 encryption** to securely store sensitive credentials and Gmail OAuth tokens.
- Orchestrated stateful AI workflows using **LangGraph** for email **classification, planning, approval, and execution**, enabling context-aware automated actions.
- Implemented asynchronous background processing with **Celery and Redis** for email fetching and AI processing without blocking the main application.
- Developed a responsive **Next.js and Tailwind CSS** dashboard with real-time approval workflows and integrated **Telegram notifications** for human-in-the-loop AI actions.

EduAble

1st Place – CODE AUTOMATA 2.1

- Developed an AI-powered accessibility-focused learning platform using **React and AI APIs** for visually, hearing, speech, and cognitively impaired students.
- Implemented multimodal learning features including AI-generated transcripts, audio learning, and accessibility-friendly interfaces.
- Designed an inclusive AI-driven learning experience that won **1st Place** at the CODE AUTOMATA 2.1 Hackathon.

TECHNICAL SKILLS

Languages: Python, TypeScript, SQL

Frameworks & Libraries: FastAPI, Next.js, React.js, Node.js, LangChain, LangGraph

Databases: PostgreSQL, Supabase, Redis

AI & Automation: Generative AI, LLM Integration, Prompt Engineering, AI Agents, Workflow Automation, n8n

Backend & APIs: REST APIs, OAuth 2.0, Webhooks, Instagram Graph API, Celery

Developer Tools: Git, GitHub, Docker, Postman, Google Cloud Platform, VS Code

ACHIEVEMENTS

1st Place — CODE AUTOMATA 2.1 Hackathon

Feb 2026

CSMIT

- Secured **1st Place** by developing **EduAble**, an AI-powered accessibility-first learning platform addressing inclusive education for visually, hearing, speech, and cognitively impaired learners.
- Implemented multimodal learning capabilities including AI-generated transcripts, adaptive content delivery, and accessibility-focused user workflows under hackathon constraints.

CERTIFICATIONS

Full Stack Generative & Agentic AI with Python

Udemy

AI-Powered Full Stack Web Development
