EDUCATION AND TRAINING

Universal College of Engineering

Bachelor of Engineering in Computer Science

Mumbai

2023 – 2027

Data Science & Machine Learning Winter Internship

Gaining practical experience in data analysis and machine learning concepts

Upskill Campus

May 2026 – Present

EXPERIENCE

AI & Automation Engineer

Kalash Platform

August 2025 – Present

- Architected an AI-powered revenue automation platform automating marketing campaigns, sales pipelines, and customer lifecycle workflows through integrated automation systems.
- Engineered automation pipelines and API-based workflows enabling business data ingestion, AI-driven campaign generation, and automated campaign execution.
- Developed analytics dashboards and monitoring systems to track campaign performance, automation efficiency, and key business KPIs.

Automation Developer

Freelance

2025 - Present

- Designed and deployed automation systems for small businesses, including medical inventory management and gym operations, reducing manual administrative workflows.
- Developed automated inventory tracking and stock alert systems for medical stores to monitor product availability and streamline inventory management.
- Built workflow automation pipelines for gyms, enabling automated membership management, appointment scheduling, and customer notifications.
- Engineered an AI voice assistant for clinics to automate patient inquiries, appointment scheduling, and basic healthcare information responses.

PROJECTS

EduAble | *React, AI APIs, Accessibility Systems*

- Developed an AI-powered accessibility-first learning platform designed for visually, hearing, speech, and cognitively impaired students.
- Implemented multimodal learning capabilities including AI-generated transcripts, audio learning support, and accessibility-friendly interfaces.
- Designed adaptive learning workflows enabling assistive technologies and inclusive digital education experiences.

SalesPal | *React, Automation APIs, AI Integrations*

- Architected an AI-powered revenue automation platform automating marketing campaigns, sales pipelines, and customer lifecycle workflows.
- Engineered automation pipelines and API-based workflows enabling business data ingestion, AI-driven campaign generation, and automated campaign execution.
- Developed analytics dashboards and monitoring systems to track campaign performance, automation efficiency, and business KPIs.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Next.js, Vite, Node.js, Flask, FastAPI, Material-UI

AI & Generative AI: LLM Integrations, Prompt Engineering, Agentic Workflows, AI Application Development

Automation & Integration: n8n, Workflow Automation, Automation Pipelines, API Integrations, Webhooks

Backend & Architecture: REST APIs, SaaS Architecture, Authentication, Role-Based Access Control

Developer Tools: Git, GitHub, Docker, Google Cloud Platform, Postman, VS Code

ACHIEVEMENTS

1st Place — CODE AUTOMATA 2.1 Hackathon

Feb 2026

CSMIT

- Secured 1st place by building **EduAble**, an AI-driven accessibility-first learning platform addressing inclusive education challenges for visually, hearing, speech, and cognitively impaired learners.
- Implemented assistive learning capabilities such as adaptive multimodal content delivery, AI-generated transcripts, and accessibility-focused user workflows, demonstrating strong problem-solving and product development skills under hackathon constraints.

CERTIFICATIONS

Full Stack Generative & Agentic AI with Python

Udemy

Python Programming

Udemy

AI-Powered Full Stack Web Development
